AUTUMN PLANTING

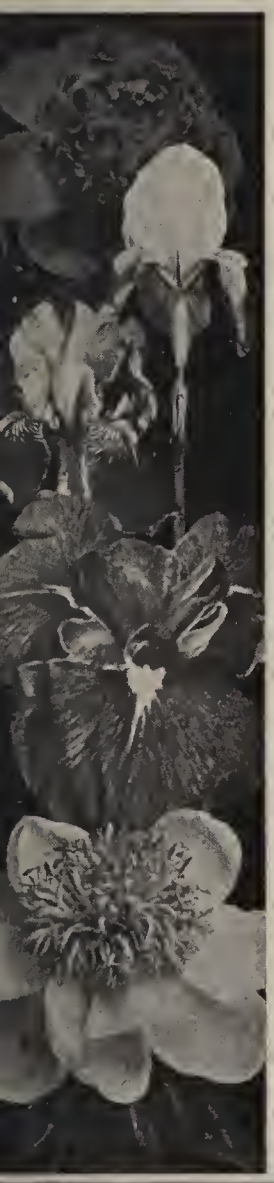
AUTUMN 1937, CATALOG No. 121

A SELECTION OF THE VERY CHOICEST TREES, SHRUBS, EVERGREENS, ETC., FROM OUR COMPLETE LISTS

WHOLESALE QUANTITY PRICES — will be found for large and small sizes in the 8-page green insert in the center of the book. Terms and conditions of sale, also. Special quantities or rare varieties not listed gladly quoted on request.

DESCRIPTIVE CATALOG? We have a supply of our Spring 1937 Short Guide. This book is one of the most complete published in the country and worth owning. If you do not have a copy write for one. Prices are, however, superseded by this Autumn catalog.

Also



SPRING BULBS
For Fall Planting

IRIS, PEONIES, TULIPS, NARCISSUS, HYACINTHS, LILIES, ETC. WITH SPECIAL QUANTITY PRICES.

The quality is of the very highest. One of the largest bulb growers in Holland furnishes us the bulbs (f.o.b. New York) all top-size healthy, guaranteed true. Our prices are lower on this grade than most other reliable bulb houses.

The Peonies and Iris are grown by one of the country's greatest experts—they are large and clean—exceptionally good. Prices as low as such quality permits.

NEW "REPEATING" IRIS

BLOOMS BOTH IN SPRING AND AGAIN IN AUTUMN

A few older kinds had this characteristic, now breeders have produced many fine colors and forms. So sensational are the possibilities that we prophesy a commanding future for this race. As yet there are still in the older spring-flowering types colors and forms too beautiful to be discarded. We will quote the better sorts on request. Here we offer a list of "Repeaters"—heralds of summer that ushers her in and out again! Just as easy of culture as the old, too! Plant in Early Fall.

Dwarf Espalier Fruits

Go to your fancy grocer and ask for the most perfect fruit he carries—it will be about one-half the size of a properly grown Espalier Fruit! It will not be as juicy and full of flavor! These facts are instantly proved to you when you see your first ripe fruit on an Espalier Dwarf Fruit Tree. For centuries they have been well known in Europe. In full sunlight, each individual fruit gets its share. Even if such trees were not ornamental, they would be noteworthy for fruit alone. But they are beautiful—clean-cut form and healthy young side growth—something new and different. Use them instead of vines against the house: train them along wire fences to add beauty and interest. Easy to grow; beautiful in flower, leaf and fruit; what more can be asked from a small tree? The strain we offer here is not to be compared with even the few other sources of Espalier Fruit Trees available in America! They are dwarfer—grafted on the proper stock—neat, and retaining their form permanently.

TERMS AND CONDITIONS OF SALE

PRICES—Net at the nursery. Packing and transportation to be added at actual cost. Usually 5 sold at rate per 10, 25 at 100 rate.

CLAIMS—for errors, shortages, or other causes must be made within 10 days.

PARCEL POST—Must be prepaid. We prefer express but will send by post if instructed and charge you at cost.

FREIGHT AND EXPRESS—Charges are extra (except in a few prepaid Special Offers). They are paid by you to the Railroad or Express man. We will estimate these costs in advance if you wish.

WATCH EXPRESS CHARGES

Most of our shipments should take Second-Class rates, so check weight and rating when delivery is made. The delivery man often charges First Class in error.

TRUCKING—Can often be arranged. Write for our estimate, if you like, on your order completely delivered.

PACKING COSTS—Free if cash accompanies order, except stock dug with a ball of earth, where packing is charged at cost (usually 10% of cost of stock). Balled, heavy evergreens: we will estimate costs in advance if you wish.

GUARANTEE—We replace at half original paid price any plant that dies.

LIMITED RESPONSIBILITY — We disclaim responsibility for any reason in amounts greater than invoiced.

WE RECOMMEND

Express on any tree or shrub without a ball of earth (B. & B.). Seedlings, Transplants and Young Aristocrats must go by express or Parcel Post.

Kelsey Nursery Service

1. We furnish high quality stock. Kelsey Nursery stock is grown where it grows best; always with regard to shipping convenience. Of over twenty thousand acres of stock we select the nearest nursery growing the material of the quality and grade you want.

2. We furnish our stock at the lowest prices made possible by mass production. Prices of nursery stock vary greatly. One nursery grows stock on land worth, say, $4,000 per acre. The stock is no better than at a nearby nursery where land is worth $400.00 per acre. We are, therefore, enabled to sell excellent stock at very low prices.

3. We are an entirely responsible source of supply. Established Sixty Years ago, in 1878, we still have among our customers many who have been patrons for forty years or more. In all our dealings we are always willing to make things right on any errors or just causes for complaint.

4. Our Guarantee—Stock to be in good condition when furnished. We will, however, replace any and all losses at half price.

5. Scarce and rare varieties: Why look through a dozen nursery catalogs for them? Send us your list and we will quote promptly. This Short Guide is necessarily confined to standard varieties, but with our facilities we can furnish almost any variety or size grown in the United States.

6. The policy of this Company is to make and keep goodwill by careful and prompt service.

KELSEY'S GREEN LIST OF SMALL TREES and SHRUBS for LINING-OUT

SEEDLINGS ("S")

Many varieties are raised from seed. These very small plants must be handled with extra care. They should be planted about four inches apart in beds. Here they are left two years and for the first year, during the heat of the first Summer, should be shaded by a lath screen. In the Autumn, mulch to prevent frost-heaving. At the end of two years, they should be taken from the beds and treated as transplants.

GRAFTS

Some trees which do not come true from seed will not even take root readily. These varieties are grafted on established roots of related species and when the graft is healed are perfectly hardy and can be treated as transplants. For this reason it is best to buy grafted varieties one year old. See "Young Aristocrats."

ROOTED CUTTINGS ("R.C.")

Many varieties do not come true to type from seed. These are propagated by cuttings of branches rooted in sand. For this reason, cuttings are much more expensive than seedlings. They require the same care (for the first year) as seedlings, but once they have passed a Winter in the beds they can be treated as transplants.

TRANSPLANTS ("X")

Evergreens that have been moved, or have had their roots pruned, tend to throw out extra roots near the stem, forming a close compact ball of fibrous roots that can be easily dug up. The transplant is sufficiently sturdy to be planted out in the open field in rows. Here the roots have room to grow, and the tops have room for shapely development.

During the depression many growers could not keep up their propagating. It takes two to six years to make young evergreen seedlings and transplants. Right now they are scarce and prices advanced. Next year they will be still scarcer. We strongly recommend placing orders at once. If you do not wish to plant until next spring we will reserve for them upon payment of 20% of these prices.

WATERING

Note well: a tree dies if its roots dry out. Whenever a shipment is received, the roots should be examined and immediately soaked if they prove at all dry. They should then be planted at once and well watered after planting and still once more two or three days later.

HEELING IN

If it is impossible to plant immediately, dig a trench in a shady spot deep enough to hold the roots and open all bundles and spread the roots naturally in the trench. The earth is carefully thrown in over the roots and tramped down, water heavily. Plants may safely remain here two or three weeks until it is convenient to plant out.

HOW MANY TREES PER ACRE?

Rows 3 ft. apart, trees 1 ft. apart	14,520
Rows 3 ft. apart, trees 2 ft. apart	7,260
Rows 4 ft. apart, trees 2 ft. apart	5,450
Rows 5 ft. apart each way	1,745
Rows 6 ft. apart each way	1,210

HOW MANY TREES IN A BED?

In a bed 4 feet wide and 10 feet long the following table indicates the number of trees.

Distance	Number
4 x 4 inches	360 trees per bed
6 x 6 inches	160 trees per bed
8 x 8 inches	100 trees per bed

SMALL DECIDUOUS TREES

The important difference between handling small evergreens and small deciduous trees and shrubs is in the matter of pruning back upon planting. Generally speaking, this is not done with evergreens. With deciduous shrubs cut to the ground upon setting them out. Trees with a single stem: prune back within a few inches of the ground and then a month later go over the planting again and cut away all but one single stem.

SUCCESSFUL PLANTING

There should not be more than a 10% loss in normal conditions.

DECIDUOUS TREES

A few years of intelligent care will turn small seedlings into specimens, but nothing can change the **nature** of the trees you choose. Pick carefully! Elm, Beech and Maples rob the soil—fine in forests but fatal in gardens. Many other rare sorts available on request. See also pges 14, 18 and 19.

YOUNG ARISTOCRATS—

Unusual and rare varieties . . . true to name because they are grafted . . . easy to grow because they have already passed a season out-of-doors. Some Winter protection is desirable, but no other special treatment. Balled and Burlapped for still easier handling. (Please remember that Dutch burlap is used and can be planted without removing.) This is an amazing opportunity to plant rare and delightful evergreens, trees and shrubs at little cost. (Weight: 1 to 3 pounds each.) 50 mixed plants (your selection) at the 100 rate.

PACKING will be charged on these Balled Evergreens. They are heavy and the cost depends on how many are ordered. We will estimate in advance if requested.

Hemlock

(Tsuga)

This is a glorious tree. It thrives in a range of soil and will succeed both in sun and shade. Do not, however, plant in windy, exposed situations. The foliage is black-green and form graceful. It is hardy and easily grown. One of the very finest of our native conifers.

American Hemlock (*Tsuga canadensis*).

A superb tree that thrives in shade and with drooping, spreading foliage. Makes a beautiful hedge and can be easily pruned. 60 to 70 feet.

FLOWERING TREES OF RARE BEAUTY

The Dove Tree

Davidia involucrata.
The late Dr. E. H. Wilson wrote of the Davidia that it is "the most interesting and most beautiful of all trees which grow in the north-temperate regions." The white flowers and their long pendulous bracts, when stirred by a light breeze, resemble huge butterflies or small doves fluttering amongst the bright green leaves. Blooms in May and June.

	Each
18 to 24 inches	$15.00
2 to 2½ feet	20.00

Stewartia Pentagyna

This extremely choice and rare American native makes a handsome small tree with large, showy white flowers in July and has bright green leaves changing in autumn to orange and scarlet. Very choice. Hardy. Humus.

	Each	10
2 to 2½ feet (light)	$2.00	$15.00

Stewartia Pseudocamellia

Larger white and gold flowers in August. Rare.

	Each	10
2 to 3 feet	$2.00	$16.00

Stewartia pentagyna (insert): pseudocamellia

Japanese Flowering Cherries

These are among the most beautiful introductions to our American gardens. All hardy. Choice and rare.

FUGENZO (James H. Veitch). (Kofugen).
One of the latest to bloom. Unusually large double pink flowers.

KWANZAN.
Large, very double pink flowers, almost red in bud. Well formed; vigorous.

MOUNT FUJI (Shirotae).
Undoubtedly the finest double white.

NADEN (Siebold Cherry).
Pale pink, semi-double blossoms arranged in short-stemmed clusters.

SHIROFUGEN (Double Blush-Pink).
Pink in bud, the very large, double flowers become white, then gradually assume a blush as they mature. Vigorous.

YOSHINO (Yedoensis; Single Blush-Pink).
First to bloom. Single; pink. This is the species famous in Washington, D. C.

Prices on above
5 to 6-foot specimens, $2.75 each; $26.00 for 10
4 to 5-foot trees, $2.25 each; $20.00 for 10

Culture of Cherries
Extremely easy to grow. Any soil fairly well drained. Sun. Slightly acid (suggest planting among rhododendrons). Set out about 20 feet apart and do not prune much.

AMANOGAWA (Upright Cherry).
A distinct form with a Lombardy poplar style of growth. Semi-double pink flowers gracefully hang in dense clusters.

5 to 6 feet	$3.50
6 to 8 feet	4.25

Amanogawa

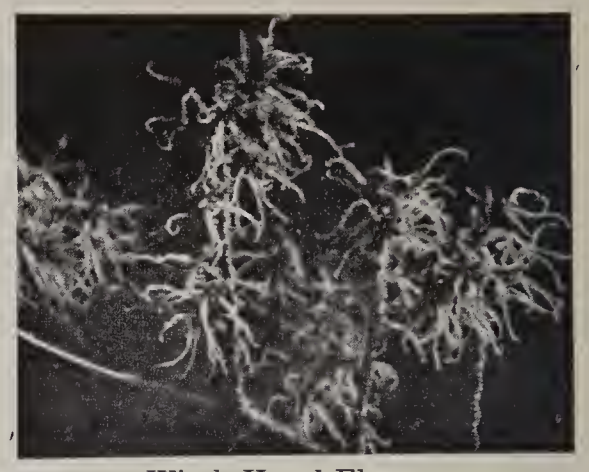
Double Weeping Cherry

2-year heads $3.50

Single Weeping Cherry

A fine flowering tree with single pink blossoms.

2-year heads $3.50



Witch-Hazel Flowers

Hamamelis (Witch-hazel)

Japonica (Japanese Witch-hazel).
25 ft. Spreading, shrubby tree. Woodsy conditions, but tolerant. Yellow in February snows. Showy.

	Each	10	100
Plants from 4 in. pots	$1.10	$10.00	

Mollis (Chinese Witch-hazel).
20 ft. Better than the Japanese—fragrant, more showy, red within. Blooms also in February. Photo above.

Plants from 4 in. pots	1.10	10.00	
2 to 3 feet	2.75	22.50	

Vernalis (Spring Witch-hazel).
6 ft. Pure yellow in early March. More fragrant. Bushy, suckering clumps. Prefer damp soil.

15 in 18 inches, B&B	$1.00	$7.00	$ 65.00
18 to 24 inches, B&B.	1.50	12.00	100.00

Vernalis rubra—Blooms red, but not fragrant.—(Same prices as the yellow).

Hardy Hybrid Laburnum

Laburnum Vossi.
Chains of golden flowers in June. A hybrid, hence blooms young. Very rare.

	Each
3 to 4 feet	$3.50
5 to 6 feet	5.00

The Long-Lost Franklinia

The Franklinia (*Gordonia alatamaha*) is the rarest native American flowering tree. Found by John Bartram in 1790. A small tree to 30 feet with white, showy flowers 3 inches across in August and through September. Very fragrant Damp, humus soil.

18 to 24 in., $2.00 each; $17.50 for 10.
2 to 3 feet, $2.50 each; $20.00 for 10.
3 to 4 feet, $3.00 each.
4 to 5 feet, $4.00 each.

It is not generally realized that the Franklinia bears flowers when very young. An 18 to 24-in. tree should flower next year! Stewartia pentagyna of same size, on the contrary, will take 7 or 8 years.

Chinese or Siberian Elm
Ulmus pumila

Where screen or shade is wanted in a hurry—and yet permanent screen and pleasing shade—page the new Chinese Elm. Phenomenal tales of its speedy growth and hardiness are told and most of them, strangely enough, seem to be true. It has few troubles. The only one seems to be a distaste for heavy or poorly drained soils. Each tree, upon planting, should be trimmed back. The trees offered below are grown from hardy North China seed.

McCallister Burlington Pecan Chinese Chestnut Stabler Thomas Wiltz-Mayette

HARDY GRAFTED NUT TREES

Hardy types of both English Walnuts and Pecans are now available for the North. Delicious Black Walnuts with easily opened shells—Hybrid Hickories with haunting flavor previously unknown even to epicures. Most amazing of all, these varieties will bear nuts as early as the third or fourth year. Hardy in New England.

English Walnuts

Wiltz-Mayette. Perhaps the best variety for all purposes. It is a reliable bearer. The English Walnut requires a lime soil. First crop may be expected in three to four years.

	Each	Doz.		Each	Doz.
3 to 4 feet	$2.75	$27.50	5 to 6 feet	$3.25	$32.50
4 to 5 feet	3.00	30.00			

Black Walnuts

The new grafted varieties bear their first nuts sometimes in the second year after planting, and commonly in the third to fifth year if the trees are properly fertilized.

Thomas. A really rapid-growing tree, hardy and easy to grow. The meat is attractive and tasty, but does not crack as easily as the Stabler.

Stabler. The thinnest shell. Meat falls out easily in halves or one piece. Spreading specimen with unusually ornamental form and foliage.

	Each	Doz.		Each	Doz.
3 to 4 feet	$2.00	$17.50	6 to 7 feet	$3.25	$32.50
4 to 5 feet	2.25	22.50	8 to 10 feet	5.00	50.00
5 to 6 feet	2.75	27.50	10 to 12 feet	6.00	60.00

Blight-Resistant Chestnuts

Chinese Chestnut (*Castanea mollissima*). Larger than the American, of fine flavor, and sweet. It is inured to the Chestnut blight.

All Grafted Trees. Very much better nut-bearing. Bear about as soon as apples. We strongly recommend these.

	Each	Doz.		Each	Doz.
3 to 4 feet	$1.75	$17.50	5 to 6 feet	$2.25	$22.50
4 to 5 feet	2.00	20.00	6 to 7 feet	2.75	27.50

Hardy Pecans

The quality of the nuts in these varieties is in every way the equal of commercial Pecans. They will bear in three to five years.

Busseron and **Butterick** are the oldest and best varieties. The differences are slight. It is advisable to plant one of each kind so that they will cross fertilize.

	Each	Doz.		Each	Doz.
2 to 3 feet	$2.15	$20.00	7 to 9 feet	$4.50	$44.00
5 to 6 feet	3.25	32.00	8 to 10 feet	14.00	

Hybrid Hickories

Burlington (also called Marquardt). Resembles the pecan as to the nut. Delicious flavor. The tree is very easily grown, a rapid grower, and extremely hardy. Does well in Minnesota. Very satisfactory tree. Reliable early bearer.

McCallister. Unique tree. Nearly as thin-shelled as any pecan, but its flavor is that of the delicious wild Shellbark Hickory. The nut is over 2 inches in length and is larger than any southern pecan. Foliage resembling the pecan—a beautiful tree. Irregular bearer.

	Each	Doz.		Each	Doz.
3 to 4 feet	$2.75	$27.50	7 to 8 feet	$4.50	$45.00
4 to 5 feet	3.00	30.00	8 to 10 feet	6.50	60.00
5 to 6 feet	3.25	32.50	10 to 12 feet	8.00	80.00

CARE OF NUT TREES

Nut trees have large root-systems. They must be pruned off. The tops, pruned to make up for the loss of roots. The first two years mulch well with hay or straw and water if drought comes.

PERSIMMONS
Grafted trees
Early Golden and Kansas.
3 to 4 feet $2.25 each.

THE HUGE HYBRID BLUEBERRIES

Two decades of hybridizing and testing and now you can grow Blueberries three-quarters of an inch across. Delicious, smooth flavor. An acid soil is needed; mulch as for rhododendrons. The year after planting remove all flower-buds. The third year you may leave the flowers and enjoy the first fruit.

Blueberry Culture

Blueberries require an acid soil containing peat or other rotted vegetable matter. They need a moderate supply of soil-moisture, and good drainage so that the roots can get air during the growing season.

Set the plants in beds 3 feet apart one way and 4 to 5 feet the other way. Two varieties should be included in every planting, as an exchange of pollen is necessary to produce good crops of berries.

The second year remove the flower-buds in order to throw the full strength of the plants into the top and roots. The third summer the flower-buds may be left and the plants should produce a good crop of fruit.

Varieties Available:

Life-size Blueberries

Rubel. Vigorous. Large blue berries in July.

Pioneer. Smaller bush; larger berries. A heavy bearer and early.

Cabot. The earliest. Broad, low bush. Delicious berries.

Rancocas. Slender, upright bush. Berries larger than Rubel, a few days earlier.

Concord. A large bush with huge berries of fine flavor.

Jersey. The largest bush, also the largest berries. Vigorous. Light blue.
